CT, DSA, nuclear therapy
CT in coop. with the clinic
in Schwäb. Hall

Physiotherapy

With this performance

the Hohenlohe Hospital does not only ensure the mostly needed routine treatment of a 'family hospital' but it offers specialized attendance on a very high level by focusing in different units.

*Highly qualified care
in a neighbourhood hospital
for all age groups*

We offer complete treatment by a well-trained nursing staff – partly taught in our own training school for nurses-, therapists, social services and pastoral care as well as volunteers.

Hohenlohe Hospital is perfectly connected to all the general practitioners of the county. Together we organize advanced training courses and discuss medical-ethical problems

We cooperate with a regional consortium for the provision of outpatient services which are non-profit making organizations and thus, highly qualified aftercare - individually adjusted- is guaranteed.
